

MCAFDO Meeting
February 24, 2020 and February 27, 2020

Environmental Sample Training Workshop
Monday, February 24, 2020
8:00am–4:30pm

Description

Environmental samples can often link an illness to establishment for a period of time after food is no longer available. Learn more about how to conduct environmental sampling in retail food (restaurants, grocery, etc.) for outbreak investigations including practical exercises.

Agenda

8:00am – 8:30am: Sign-in/meet and greet

8:30am – 12:30am: Classroom presentation

- Why sample?
- When to sample?
- Steps to conducting environmental sampling
- Assembling a sampling team
- Donning/Doffing Gloves
- Types of sampling materials
- Sampling locations
- Sampling technique
- Documentation/Sampling Log
- Verification and Delivery

2:00pm – 3:30pm: Field experience environmental sampling

- Test your knowledge using various sampling materials for different outbreak scenarios in a real kitchen with real materials

3:30pm – 4:30pm: Course evaluations and discussion

Course is limited to 36 people.
